

Hit-and-Run Victim Dies From Injuries.

Ronald MacDonald, about 22 years of age, died at the Didsbury Hospital early on Wednesday morning from injuries received when struck by a hit-and-run driver on Monday evening on the Blind Line near N. S. Clarke's farm.

The injured man was discovered by Walter Notley, who was driving into town about 9 p.m. He saw a pair of legs sticking up out of the ditch and on stopping found the man unconscious. Dr. Evans was called and it was found the injured man had received severe cuts about the head and slight body abrasions. He was taken to the hospital where he died without recovering consciousness.

MacDonald had been working for Dan Dippel during the harvest. He had purchased a bus ticket to Carleton Place, Ont., and intended to leave by the early bus on Tuesday morning. He was walking out to Mr. Dippel's to pick up his belongings when the accident occurred.

It is thought he was probably struck by a truck. The matter is being investigated by the R.C.M.P. An inquest will be held.

Church of England Notes.

HARVEST FESTIVAL.

St. Cyprian's Church of England will observe Harvest Festival services this coming Sunday, October 16, at 3 p.m., when it is hoped that a representative congregation will be on hand to welcome Archdeacon Swanson, who will deliver the sermon. Members and friends intending to donate flowers, vegetables, fruit, grain, etc. for decoration of the church interior, are asked to leave such donations at the church on Saturday morning.

W.C.T.U. Convention Now In Session

The twenty-fifth annual convention of the Alberta Provincial W.C.T.U. opened its three-day session at the Evangelical Church on Wednesday morning, when about 45 delegates from all parts of Alberta were present.

The convention was called to order by Mrs. Grace Knight, of Edmonton, the Alberta president, and during the morning Mrs. McPherson, of Islay, spoke on "Twenty-five Years of W.C.T.U. Work in Alberta."

During the afternoon session peony roots were planted on the lawn at the Bible School in memory of the late Frances Willard, and a marker was presented to the Town of Didsbury. Miss Madden, a missionary from India, also gave an address.

The convention banquet was held at the close of the session, when the delegates were welcomed by Mayor Chambers. Mrs. Boorman, for the United Church W.M.S., and Rev. A. Traub, of the M.B.C. Church, also gave greetings to the convention.

A pretty ceremony observed in celebration of the 25th anniversary of the Alberta W.C.T.U. was that of a birthday cake presented by Mrs. Morrow, of Nanton, and cut by Mrs. J. V. Berscht, Didsbury.

In the evening an address on "The Court's Responsibility in Accident Prevention" was delivered by Magistrate Fitch, K.C., of Calgary.

To Resume Farm Placement Scheme

Resumption of the farm placement scheme for relief of unemployed was announced Friday in Edmonton by Hon. Dr. W. W. Cross after receiving communication from Ottawa.

Evangelical Church Notes

"One Hundred Years of Mission Work in the Evangelical Church" will be the subject next Sunday morning. The evening subject will be "A Challenge to Decision."

Everybody Come!

Special Music and Orchestral Numbers!

Pioneer Pastor Visits Didsbury

Rev. J. Ferguson, of Nelson, B.C. visited his sisters Miss M. Ferguson and Mrs. Gibson, the earlier part of this week and renewed acquaintance with old friends.

Mr. Ferguson was the pioneer Presbyterian minister at Didsbury. When he first arrived here he preached in the hotel, an implement shed and even a tent before the church was built in 1902. He was pastor at Didsbury until 1908 and during his pastorate besides the church being erected here, churches were built at Westcott and Carstairs.

Junior Board of Trade Activities.

THE regular monthly meeting of the Junior Board of Trade was held at the School on Thursday evening, with Mr. Ed. Ford in the chair.

The swimming pool project was discussed at length and it was intimated that plans for the pool would be ready for presentation at the next meeting.

It was reported that trucks were making a practice of parking on the business streets in town and impeding traffic. The matter will be brought to the attention of the town council.

Mr. W. A. Austin gave an address on "Public Health and Hospitalization." He pointed out the need for better hospital facilities in Didsbury and the members expressed their intentions of working towards that end.

Mr. Austin was accorded a vote of thanks for his talk.

WEDDINGS

At a quiet ceremony at Knox United Church, Calgary, on Saturday, October 1, the marriage of Miss Marcella E. Roper and Mr. John M. Allen, both of Didsbury, took place.

Rev. C. Harvey Morrison officiated at the ceremony, at which the bride and bridegroom were attended by Miss Elsie Jennings and the former's brother, Mr. Victor Roper.

Neapolis Co-operative Dairy Association Organizes.

The organization meeting of the Neapolis Co-operative Dairy Association was held in the Lone Pine Hall on Tuesday afternoon, with about fifty farmers present. Mr. Ed. Liesemer was elected to the chair.

Mr. J. C. Wiebe gave a favorable report on the work done by the investigation committee previously elected. The committee's proposals were unanimously adopted.

The first speaker called upon was Mr. Silcox, of Edmonton, provincial inspector of cheese factories, who explained the scheme under which the cheese factory at Neapolis should be conducted.

The next speaker, Mr. Christensen, provincial supervisor of co-operative activities, detailed the by-laws the provincial government had prepared for such a co-operative movement as that at Neapolis.

The election for the sites proposed proved the majority were in favor of the building being erected on the land immediately to the north of T. E. McCaig's farm home east of Didsbury.

The necessary association papers were then duly signed and the following slate of officers elected:

President, J. C. Wiebe
Vice-President, Ed. Liesemer
Secretary, Henry Peters
Directors: C. P. Reimer, Henry Rempel and Dave Peters.

Mr. Christensen and J. C. Wiebe drove to Didsbury immediately after the meeting to take out an affidavit on the articles of association.

It is expected by the board that the plant will be in operation before winter.

Lesson For Husbands.

Husbands who object to their wives' dress bills should take a look at the bill the Warner Bros. have to pay for the costumes in one sequence of "Jezebel," the deep south drama due at the Opera House this weekend.

For the sequences, the Proteus ball scene, Orry-Kelly designed 150 white dresses for the extra players. The dresses, of organdie and lace cost \$200 each.

In the ballroom sequence Bette Davis and Henry Fonda waltzed an estimated 36 miles. The sequence took a week to film and several takes were made of each scene.

The two pistols used by George Brent and Richard Cromwell are museum pieces, each worth \$1,250. "Jezebel" is a drama of old New Orleans starring Bette Davis. And just to remind you, folks, you've only three days left in which to hand in your 50 word description of who Jezebel was, for a prize of \$5, and a

The Big Four

When one considers that a few simple and inexpensive precautions could prevent a great deal of it, it seems incredible that the annual property loss by fire in the three prairie provinces, despite a general downward curve in the past six years, still hovers around the million dollar mark in each of these provinces.

During the period, 1935 to 1937 inclusive, the annual toll paid to the fire demon in Saskatchewan and Alberta has averaged over a million dollars each with the Alberta figure jumping to a million and a half in 1937. In the same period Manitoba's annual tribute to flames has averaged around \$900,000.

Expressed in per capita figures—for that is the true test of the comparative cost of carelessness where fire is concerned—the loss in 1937 ranged from \$1.93 per head of population in Alberta to \$1.12 in Saskatchewan with the Manitoba loss standing at \$1.24 in the same year.

While it is a matter of congratulation that these losses are materially less in each of the provinces than in 1931 and 1932, roughly reduced by fifty per cent., the losses are still much greater than they need be, if a few simple protective measures which are available to every person at very little expenditure of either time or money were adopted, and if people would not forget that danger is ever present where fire in any form is used.

Results Of Forgetfulness

Too much stress cannot be laid on the injunction to remember at all times that where there is fire there is risk, for there are few who have reached the age of discretion who are not aware of the dangers and the measures that should be adopted at all times to minimize them. Disaster is not usually the result of lack of knowledge but of forgetfulness.

That is the reason for the value of fire prevention week. Coming as it does at the season of the year when preparations are being made to maintain warmth for the winter months, it serves as a reminder of the necessity of taking precautions to prevent disaster and loss at a time when danger is accentuated, or rather, when additional risks loom on the horizon.

Analysis of statistics and information in the possession of superintendents and commissioners of insurance show that in the three prairie provinces the bulk of the fire loss is comprised of small buildings and their contents. In 1937 there were comparatively few large conflagrations except in Alberta where large buildings and contents to the value of over half a million dollars at half a dozen points went up in smoke. It also demonstrates that the greatest percentage of loss is in small villages and in the rural districts.

This is not surprising when it is remembered that the cities and larger towns are equipped with efficient fire fighting forces and apparatus, water-works and fire alarm systems and a convenient telephone system which protect the urban residents from the consequences of their carelessness. Were it not for these facilities the losses in the urban centres would be appalling.

The information in the possession of these officials also demonstrates that on the prairies the fire demon has four very active disciples—the big four, who serve his cause faithfully. They are (1) Cigarettes and careless smokers; (2) Defective chimneys; (3) Overheated stoves and stove pipes and (4) Gasoline and other inflammable liquids.

The evidence further supports the contention of government officials that the bulk of the loss is sustained first by dwellings and their contents and secondly by barns and other farm buildings exclusive of residences.

Much Is Avoidable

These facts and figures demonstrate very clearly that a very large percentage of this loss could be avoided were it not for lack of thought or lapse of memory.

The information suggests to anyone who cares to give the subject a moment's thought the vital necessity of periodic and careful inspection of all heating apparatus in the home, of the importance of seeing to it that stove pipes and chimneys are cleaned and kept clean and that if a stove is too close to framework for safety to move it out.

The facts and experience demonstrate that natural grass and weeds growing up near a house or other building should be cut, raked up and removed and that hot ashes should not be placed where wind may carry sparks to ignite a combustible structure.

Experience also shows the wisdom, where stubble is to be burned, of sticking to the law which requires that fireguards of 20 feet or more be plowed around the field to be burned off and that three men be on hand to prevent the flames from getting beyond control.

If these and other precautions with respect to the use of gasoline, coal oil and ignited smoking materials were strictly observed at all times, the fire losses in the prairie provinces would be reduced to an almost negligible figure, to say nothing of the lives that would be saved and the injuries that would be avoided.

It is a common fallacy that all spring water is pure, and good to drink. Its purity depends upon the ground through which it seeps.

Exports of fresh apples from Canada to Belgium in 1937 (10,505 quintals) were approximately six times as large as in 1936.

A skating rink has been carved inside an Alpine glacier, near the top of the Jungfrau.

Sand or gravel in the gizzards of birds is necessary for the grinding of food, since no modern bird is equipped with teeth.

In Siberia, natives build their granaries on stilts so that tremendous snows of winter will not cover them up.

Successful vaccinations against disease have been performed on silkworms, it is said.

More Elevator Space

Alberta Pool Needs More Facilities At Vancouver

The Alberta wheat pool is seeking to lease additional terminal elevator facilities at Vancouver, it was learned at the head office in Calgary.

It is possible the pool may take over the Vancouver harbor board's No. 2 elevator, which has a capacity of 1,600,000 bushels.

Negotiations are under way with federal authorities and should the lease be obtained, the additional facilities would increase the pool's storage capacity at the coast to 6,600,000 bushels.

The pool's own terminal at Vancouver has a capacity of 5,500,000 bushels.

For the first time in three years the bulk of Alberta's wheat crop is travelling the western route to the Pacific terminals.

The westward movement is attributed in part to wheat board operations.

Pacific coast terminals have a storage capacity of around 21,000,000 bushels.

Drop Foreign Names

But Italy's Night Clubs Anxious For Foreigners' Patronage

Restaurants, cafes and night-clubs in Italy no longer to bear names of foreign origin, according to a circular issued by the National Fascist Federation of Places of Entertainment.

In future no restaurant may be called "Metropole," "Beau Site," "Bellevue" or "Chez Vous", or have an Anglicized Italian name, lest it should recall the period of "artificial refinement" before the Fascist era.

Night-clubs, such as "Monte Carlo Nights," "Bagdad" and "Hollywood," must henceforth be rechristened "Nights," "Villa d'Este" for "Venice," as these names are considered more in keeping with the Italian spirit of to-day.

There is to be no slackening, however, in efforts to entertain foreigners and in all restaurants a proportion of the staff must be able to address guests in their own languages.

For Soil Erosion

Extension Of Forestry To Control Flood Problems

Extension of forest land gives much better mastery of flood problems than other methods, Dr. C. G. Bates of the United States forest service, St. Paul, Minn., said in a paper on "Reforestation and Flood Control" before the American Association for the Advancement of Science.

The term "flood control" is rather loosely used to designate both prevention and protection, he said. Forestry's primary concern is with prevention. In the U.S. the opportunity for demonstrating the degree to which forest could retard and control water flow was never better.

Dr. Bates discussed principally the flood and farming problems of the great Mississippi Valley, where flood control, either by artificial reservoirs or better use of the natural reservoirs, is inextricably bound up with erosion control. Artificial reservoirs will have a short-lived value so long as sedimentation occurs to the present extent, he said.

"It can be shown that well-kept forest land has practically unlimited possibilities for absorbing rainfall and preventing run-off and erosion, and hence that the extension of forest land gives much better mastery of flood problems than any other proposal. The limits are economic, not physical, and hence the problem must be approached in thoroughly practical, non-sentimental manner."

More Doctors Than Lawyers

Canada Has One Physician For Every 1,000 Persons

The last census showed over 8,000 persons occupied as lawyers in Canada, and 544 justices and magistrates, not all of whom were necessarily graduates of law schools, but most of whom are likely to be placed as such. There is thus one lawyer for every 1,200 of the population and as there is one doctor for every 1,000, it would seem to appear that our bodily ills take more looking after than keeping us within the rules by which society governs its actions.—Kitchener Record.

Was Servant Of Public

Prince Arthur Of Connaught Will Not Soon Be Forgotten

Prince Arthur of Connaught was a notable example of a man born to high position, rich in all the material things of life, who yet deemed himself first and foremost the servant of the public, who ever set duties of State before personal indulgence, and who undertook with unfailing cheerfulness onerous as well as simple tasks. His slim figure with its slight limp, was welcome everywhere. He mingled with the humblest as well as with the mighty. He was ever ready with a quip or a word of sympathy—and acts of sympathy more concretely expressed. Both army and navy loved him for himself alone. Though he had been out of the public eye for some years, owing to delicate health that pursued him all his days, yet he was not forgotten, and there will be made a poignant recollection and many a word of heartfelt regret at his passing.—Montreal Star.

DAILY T.C.A. EXPRESS SERVICE UNDERWAY

For weeks the deep throb of powerful motors has been heard nightly over mountains and plains of western Canada as pilots of Trans-Canada Air Lines have carried on extensive training schedules, perfected technique in radio beam flying, put new equipment to rigid test. Definite announcement relative to commencement of regular services has been made. Monday, September 19, marked the inauguration of air express service across the West. Under the schedule Winnipeg is less than eight hours travel from Vancouver. Transport of mail is to begin early in October, feeder lines linking with the main line route at Regina in Saskatchewan and Lethbridge in Alberta. The top photograph shows a Lockheed 14, of which Trans-Canada has 10, landing at Vancouver after a night flight across the Rockies. At lower left is the pilots' compartment with its vast array of instruments, most modern of safety devices and controls. At lower right, mail is being checked into the nose compartment of the plane. A Lockheed 14 cruises at 220 miles an hour, provides luxury accommodation for 10 passengers and a crew of three, boasts cargo capacity of 2,700 pounds.

Canada's Tourist Trade Shows Less Decline Than Any Other Business Activity

Tourist traffic will bring between \$265,000,000 and \$275,000,000 to Canada this year, Leo Dolan, chief of the Canadian Travel Bureau, Department of Transport, estimated. Last year's estimated tourist traffic revenue was \$295,000,000.

"The tourist industry has shown less decline than any other normal business activity in Canada this year," said Mr. Dolan.

Canada up to July 31 received 9,012,177 visitors, a drop of 6.8 per cent. from the 9,676,734 who came in the seven months ending July 31, 1937, but a general upswing was reported in August with improved business conditions in the United States, the great source of Canada's tourist trade.

The tourist business drop has been most pronounced in Ontario and Quebec because they are contiguous to the United States industrial areas that felt most keenly the recession. But in these two provinces there was an improvement in August over July.

British Columbia has done well with her tourist trade this year. Vancouver Island reports a record number of visitors. Through the customs at Victoria in the eight months ending August 31 there were cleared 26,000 United States motor cars, bringing 72,000 people to the island, a record high.

New Brunswick reports tourist trade as good as ever. Nova Scotia reported a slight decrease with Prince Edward Island about unchanged.

The Prairie Provinces report a better tourist trade than in 1936 but slightly below that of 1937. Cruises on Canadian steamers have done well this year, said Mr. Dolan. Business has been excellent.

Unsettled European conditions were expected to divert a certain volume of United States luxury class tourists to Canada but this expectation was not realized, he added.—Ottawa Journal.

Experiment Completed

Western Union Telegraph Company Buries Cable On Sea Floor

The successful completion of a four-year experiment to plough trans-Atlantic cables into the bottom of the sea, safe from damage by trawlers, was announced by the Western Union Telegraph Company.

The cable ship Lord Kelvin, which left New York last March 29, has been working 100 miles southwest of the Irish coast and has succeeded in burying portions of three trans-Atlantic cables in the bed of the Atlantic ocean.

The experiment to plough cables into the ooze of the ocean bottom comes on the 80th anniversary of what was once also regarded as impossible—the laying of the first Atlantic cable by Cyrus W. Field in 1858.

The operation was made possible by a new cable plough and the technique of ploughing ocean bottoms will save cable companies thousands of dollars in cable repairs annually, the announcement said, particularly as regards cables damaged by fishing fleets off the Irish coast.

Britishers For Australia

Fifty Young Migrants Each Month Is The Plan

Fifty young British migrants each month, from the end of this year, is the ambitious plan of the Overseas League to counteract the flow of aliens into Australia.

Unmarried males between the ages of 14 and 18, and females between 16 and 22 will be assisted to Australia, cared for on arrival, and placed at work.

They must be sons and daughters of British parents and will be recruited mainly from industrial cities.

Domestics, skilled artisans and boys who will be apprenticed to trades are to be chosen, with a sprinkling of those who can provide a little capital. Committees to look after the migrants will be formed in each state.

Los Angeles, Calif., has a law prohibiting the poking of turkeys to ascertain their tenderness.

Study Ocean Currents

Described By Scientists As The World's Greatest Windmill

Waters of the ocean are the world's greatest windmill, the fifth international Congress for Applied Mechanics was informed.

The congress, of internationally known scientists who work on the problems of Archimedes, Galileo and Newton, began its first session in four years with a study of oceans. The object is to learn how to predict long-distance weather and climate changes from discovering the laws of ocean currents.

The windmill study was reported by Dr. H. U. Sverdrup of the University of Bergen, Norway, and University of California. It is probable, he said, that the energy transmitted to the ocean by the wind is much greater than from heat.

"If this is true," he added, "the ocean represents a machine which is principally kept running at an average constant speed by the frictional drag exerted on the surface of the sea by the fast-running atmosphere."

Dr. Sverdrup proposed an alternative for the idea that the icy waters found at the bottom of all tropical oceans are due to sub-surface currents flowing from polar regions. The same thing can happen, he said, without much current.

The new mechanism for this is "lateral mixing." It is like a row of men passing a chunk of ice from hand to hand. The polar cold passes toward the tropics without the water having to flow except in small eddies set side by side like the wheels of a clock.

Reason for this belief, Dr. Sverdrup said, is a recent discovery that similar passage of cold occurs in the earth's atmosphere.

Food Value Of Potatoes

Mineral Salts That Lie Just Under The Skin Are Valuable

Whenever possible, cook the potato in its jacket. Just under the skin lie mineral salts that the body needs. When I see someone hacking the skin off potatoes I feel it is just like throwing away the baby with the bath water—the central part of the business is being forgotten. But if you feel you must skin, well then, do it as lightly as possible, or better still, strip off the skins after cooking. You'll find they will come away quite easily, and you will save both time and food value. And while I'm on the subject of the potato's food value, let me refute the belief sometimes held—perhaps because potatoes seem bulky—that they are fattening. When I explain that the potato contains nearly 80 per cent. of water, about 18 per cent. energy-giving carbohydrates, and only two per cent. body-building protein and fat, you will see at once that the potatoes no more fatten you than do pears or apples. So I hope that lady listeners especially will be reassured on this score.—Bernard Moore, in The London Listener.

Prolific Writer

Author Leaves A Million Words For His Publishers

The world has not heard the last of Thomas Wolfe, the prolific young writer who died in Baltimore from an acute cerebral infection. He was 37 years old.

There still are 1,000,000 Wolfe words to be edited, his publishers, Harper and Bros., said—the result of his winter's work in a New York hotel.

This consisted of seven paper boxes of manuscript—material for several novels, if the publisher decides to use it all.

It was said at Harpers, that the new material would be divided into at least two novels, perhaps three.

These will continue the story of the Grant family, begun in "Look Homeward Angel." This is, of course, the story of Wolfe himself and the people and towns he had known.

If a cork is soaked five minutes in olive oil it will be airtight and watertight.

Was Not Bluffing

Man Had Dynamite To Blow Up New York Bank

A man walked into the Emigrant Industrial Savings Bank at 5 East Forty-second street, just off Fifth avenue in New York, and said:

"I want \$30,000. If you don't give it to me I'll blow myself and you and the bank and everybody in it to pieces."

He waved a small leather satchel. "This is full of dynamite," he said.

A bank official, who preserved an outward calm, quietly passed word to another employee and then kept the visitor in conversation until Detective John Kaiser and other police arrived from the East Fifty-first street station and nabbed him.

The visitor had been right about the dynamite.

His satchel contained 34 sticks of the explosive and 46 percussion caps, enough to have blown out the entire interior of the bank and a good share of the building and street as well.

When he was asked by detectives why he wanted the money, he became hysterical and fought the detectives so violently that he was sent to Bellevue for observation. He was charged with violation of the Sullivan Law and attempted robbery.

The incident recalled to old timers a similar, but much more tragic incident of nearly 60 years ago.

In 1879 a stranger walked into the Wall Street office of Russell Sage, one of the country's wealthiest men, and represented himself as a messenger from John D. Rockefeller. He demanded \$1,250,000 in immediate cash, and like the visitor to the Emigrant Bank, he threatened to blow himself and the office to bits if refused.

He made good his threat. When his money demand was denied he dashed a suitcase filled with dynamite to the floor. He and an office employee were killed and 12 others, including Sage, were wounded. A newspaper reporter, playing detective, eventually identified him as Russell Norman L. Norcross of Boston.

R.C.M.P. Radio

Police Radio System For Prairie Provinces Is Anticipated

Western Canada will be surveyed within a year with a view to establishing a police radio system, Commissioner S. T. Wood, head of the Royal Canadian Mounted Police announced. The force is endeavoring to have a competent radio engineer survey the three prairie provinces with a view to establishing points where radio stations would best meet their purpose. The proposal would be to establish stations in larger centres such as Winnipeg, Regina, Saskatoon, Calgary and Edmonton.

It is estimated that some 3,420 languages are spoken throughout the world.

Doves, symbols of peace, engage in bloody battles with rivals during the breeding season.

British Astronomers Have Been Collecting New Data Concerning The Moon

Home Made Wines

Fruits And Vegetables May Be Used For This Purpose

Nearly all garden and wild fruits, as well as several vegetables, may be used for wine making, but the old courtesy of being able to offer a guest a cup of delicate dandelion, elderberry, rhubarb, mulberry, parsnip, or other such home-made wines seems to be on the wane, principally because there may be some of the younger housekeepers in the city who do not know how to make it. No great amount of equipment, however, is required and there are only two essential rules to be observed, first, the fruit or vegetable used must be of good quality, and second, strict attention must be paid to cleanliness. No licence is required for making wine for home use only, but its sale is prohibited unless the vendor has a licence to manufacture and sell.

Full instructions in the art of making wine in the home, together with several recipes, have been prepared by R. W. Arengo-Jones of the Division of Horticulture, Central Experimental Farm, Ottawa, and may be obtained in booklet form on request from the Publicity and Extension Division, Dominion Department of Agriculture, Ottawa. Following are two recipes taken from the bulletin:

Beet or Mangold Wines—For beet or mangold wine, the ingredients required are eight pounds beets or mangolds, two gallons water, seven pounds sugar, two ounces ginger, and six oranges. Wash the roots but do not peel. Cut in pieces and boil until soft. Add sugar, oranges (cut in slices) and ginger. Boil 20 minutes. Strain and when cool add one yeast cake dissolved in a little water. Allow to stand in crock for five days and then run into a keg to complete fermentation. Let stand for about one month to clear and then syphon into bottles.

Parsnip wine—Parsnip wine is made by first scrubbing the parsnip roots and cutting off the green stem part. Shred finely and allow two quarts of water to each quart of shredded roots. Boil until soft and then strain off the liquid and let it stand for 24 hours to clear. To each gallon of the clear liquid add three pounds of sugar, one piece of ginger root and one lemon sliced thin. Boil for 20 minutes and when cool add one yeast cake. Let the wine ferment for a few days in a crock and then strain and run into a keg to complete the fermentation.

Wild ducks grow their wing feathers after their body has been covered, but upland fowl grow their wing feathers first.

The motor-car has almost done away with the horse, but not with the ass.

Jiffy Knit is Easiest of the Easy

PATTERN 6019

Large knitting needles and some Shetland Floss make this jiffy knit a delight to novice or expert. It's knitted round and round in stockinette stitch, beginning at the neck and working down. Stunning sun-burst detail all-around the neck, smart raglan sleeves and snug ribbing at neck and wrists—all easy to do and quickly finished. The plain knitted skirt, smartly flared, completes the costume. Pattern 6019 contains instructions for making the blouse and a skirt in sizes 16-18 and 38-40; an illustration of blouse and of stitches; materials needed.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Blouse Worked Round and Round Has No Side Seams

The moon is our nearest neighbor, the satellite of our planet; it is, indeed, in the picturesque phrase of the famous French astronomer Flammarion, "our detached continent". It is somewhat remarkable, therefore, that a body so near to us, only 238,000 miles away, should have been comparatively neglected in recent years.

Yet this is the case. It is significant that in a recent history of astronomical progress by a competent writer the moon does not get a chapter to itself. The reason is that in recent years comparatively little work has been done on the moon.

Neglect of the moon dates from the middle of last century. In 1834 the famous German astronomer, Madler, in collaboration with his wealthy pupil Beer, put the finishing touches to the astronomical classic "Der Mond", along with which was published the most detailed chart of the surface of our satellite which up to that time had been constructed, and which included the positions of nearly a thousand formations—mountains, craters and plains.

At the beginning of the century the American astronomer Prof. W. H. Pickering (who died only a few months ago) began his long-continued series of observations, both visual and photographic, on selected areas of the lunar surface. He reached the conclusion that the moon was not so "dead" as it had been assumed to be. He believed that he had evidence of the existence of a very thin atmosphere, with a density of one ten-thousandth part of our own.

He also reached the conclusion that volcanic activity persisted on a small scale, and that hoar-frost was extensively deposited. He likewise believed that he had proof of the existence of a rudimentary form of vegetation, in the low-lying regions, deep valleys, and crater-bottoms, confirming some earlier conclusions of Flammarion.

Pickering was a first-rate observer, but he found few astronomers ready to accept his conclusions. Admittedly, the lunar surface is difficult to study, and most astronomers continued to believe that the minute changes which he believed himself to have recorded, were due to changes of color and contour arising from the angle of illumination. In spite of almost universal skepticism, Pickering stoutly maintained, right up to the close of his observing career, that minute changes do take place in the moon. Impartial students, too, could not help noting that the astronomers who dismissed his conclusions as unworthy of discussion were generally those who had never studied the moon.

The interest in the moon which Pickering's work created died down years ago, but the subject has been re-opened by an English amateur astronomer, Mr. Robert Barker, who has collected a considerable amount of data which tend to support Pickering's conclusions.

Observation of minute detail on the moon's surface is difficult at all times, and photography does not help much. But Mr. Barker's conclusions are of interest because they appear to confirm the observations of Professor Pickering. A great deal more work is necessary, however, both visual and photographic, before any degree of certainty can be reached. It is to be hoped that Mr. Barker's important paper, recently submitted to the British Astronomical Association, will act as an incentive to a more general interest in the moon.—Manchester Guardian.

In Mysore, India, woollen blankets are made so fine that one 18 feet long can be rolled inside a hollow bamboo.

The World of Wheat

By H. G. L. STRANGE

Director "Crop Testing Plan"

"These registered and certified seed growers seem to ask a pretty high premium for their seed. Isn't there some way to get it cheaper?" a friend asked me last week.

"The seed is well worth the price asked," I told him. "It takes a lot of extra expense and care to grow Registered and Certified seed, but," I said, "If you don't want to pay the seed grower for doing the extra work, why not do it yourself and so save money."

"How?" he asked.

"Lay down a seed field on your farm," I advised. "Choose five or ten acres of your very best summer-fallow, and then buy only a few bushels of the best Registered or Certified seed, and sow it on this small field, leaving an alleyway bare all around it. Protect the field, rogue it, harvest, thresh and special bin the grain with care, and then by next year you will have enough seed for a large acreage."

"Oh," answered my friend, "that's a lot of trouble though, isn't it?" Well I ventured to say, "That's life all over, either we must go to extra trouble ourselves to produce an extra good thing, or pay someone else to do it for us."

Following factors have tended to raise price: Seeding in Russia behind a year ago -- No further permits for south African corn exports -- Expect unusually small Italian corn crop -- War risk insurance rates reduced -- Threshing in Poland not up to expectations -- Increased complaints of deterioration in Australia -- Food grains in Northwest India deteriorate owing to continued dryness.

Following factors have tended to lower price: Roumania endeavoring to sell a substantial amount of wheat -- Rains bring relief in Argentina. Official reports state conditions satisfactory -- Food Research Institute estimates 1938 world wheat yield may be greatest in history -- Corn planting becomes active in Argentina -- War possibilities fade and wheat offerings increase.

Notes From the West

Mr. and Mrs. M. Campbell were Calgary visitors Saturday.

Mrs. W. Banting has as visitors her two sisters from Ontario.

Mr. H. Barnard, who had been in a Calgary hospital for some time, returned home on Tuesday.

Mrs. R. Haener went to Calgary on Tuesday to visit Mrs. H. Haener, who is in a hospital in the city.

Mr. and Mrs. P. Hosegood were visitors on Sunday with Mr. and Mrs. A. A. Blain.

Mr. and Mrs. E. Parker and Mr. and Mrs. A. L. Hogg were the dinner guests on Sunday of Mr. and Mrs. D. Evans.

Knox United Church Notes.

The services next Sunday will be in charge of the minister and a cordial welcome is extended to all.

Marquis Wheat Losing Ground

In 1936 Marquis wheat occupied 59.4 per cent of the total area seeded to wheat in the three prairie provinces. This last spring however, only 54.4 per cent was seeded to Marquis, all as shown by a survey of the "Distribution of Wheat Varieties in Western Canada," recently made by the Research Department of Searle Grain Company, Ltd.

Marquis has lost ground to the rust-resistant wheat, Thatcher, and to a slight extent to the still newer rust resistant sorts, Renown and Apex. The tendency for the replacement of Marquis by these rust resistant sorts is still going on at a rapid pace. It is probable, therefore, that after the next seeding, while Marquis will still be the dominant wheat in Western Canada, the percentage of land seeded to this notable variety will be considerably less than 50 per cent.

In Alberta Marquis occupies 44.8 per cent of the acreage in wheat, Red Bobs 29.5 per cent, Garnet 16.5 per cent, Reward 6.3 per cent, Durum 5 per cent, Thatcher and miscellaneous varieties 2.1 per cent.

In Saskatchewan Marquis occupies 70 per cent of the acreage in wheat, Thatcher 14 per cent, Reward 5.6 per cent, Garnet 4.8 per cent, Durum 1.7 per cent, Ceres 1.5 per cent and miscellaneous varieties 4.2 per cent.

In Manitoba Thatcher occupies 52.4 per cent of the total wheat acreage, Durum 26.1 per cent, Marquis 4.3 per cent, Reward 4.3 per cent, Renown 4.8 per cent, Ceres 3.6 per cent and miscellaneous varieties 2 per cent.

BIRTHS

At Mrs. Pidgeon's Nursing Home, Olds, on October 4th to Mr. and Mrs. Don Hardy of Didsbury, a son.

At the Holy Cross Hospital, Calgary, on October 5th to Mr. and Mrs. C. M. Pratt a daughter.

TEACHING THE YOUNG IDEA

Your boy may not have exhibited any particular signs of genius but, if he is a normal youngster, he shows a healthy curiosity about things. He wants to know what is going on around him and what it means.

His teacher will tell you that his craving for knowledge is just as natural and healthy a sign as a good appetite. His brain gets as hungry for information as his body for food, and it is just as important that it should be satisfied.

Nothing you can give him will provide such a fund of interesting and varied information as a newspaper. A good newspaper is a potent stimulus to thought and development. It is the history of today, covering every field of human endeavor. You will find few teachers who do not read a newspaper. They know its value in keeping a mind alert and in tune with the times.

Give your family this important advantage. It means so much to young and inquiring minds.

Burnside Notes

You are invited to dance at Lone Pine Hall next Friday evening, October 21st. Didsbury 5 piece orchestra.

Mr. and Mrs. Joe Clarke spent a few days last week in Calgary.

We are sorry to hear that Mrs. Ed Anderson is undergoing treatment at the Holy Cross Hospital in Calgary.

Miss S. Zook and Joan Woods, of Didsbury, were Thanksgiving guests of the latter's parents here, Mr. and Mrs. B. Woods.

Mr. and Mrs. Archie Weber of Didsbury spent Sunday with Mr. Hugh McLean and Mr. and Mrs. Fred Fritz.

Mr. and Mrs. E. R. Dawson of Sunnyslope called on Mrs. N. Eckel on Sunday afternoon.

Mr. and Mrs. Charles Welch and Harold Hobbs of Calgary spent Thanksgiving with Mr. and Mrs. A. E. Thompson and family.

Messrs. Lewis Spraggs and Marvin Armitage of Dawson Creek called on friends and relatives here on Tuesday on their return from Saskatchewan, where they had been working in the harvest.

Burnside was well represented in Calgary on Friday. Mr. and Mrs. Charles Mardon and son Charles, Mr. and Mrs. Walter McCulloch and Jessie, and Sam Elliott, Mrs. N. Eckel, Robert Eckel, Miss Evelyn Charlton and Miss Gertrude McLean, all spent the day in the city.

Carstairs E. Community

Follow the crowd to the Amateur concert at the Hall this Friday night.

P. Nuss has purchased a new Chev. light delivery.

H. D. Anderson, W. E. Rieder and son Wilbert left on Tuesday on an antelope hunt.

Levi Siebert and G. Hanson made a business trip to Cremona last Monday.

Westcott Notes

The Westcott W.I. met with Mrs. M. Jacobsen on Thursday, when arrangements were made for the annual bazaar. Watch for further announcement. The wool contest was held and results were as follows: In the knitting class, 1st, Mrs. A. M. Robertson, 2nd, Mrs. Macfarlane; in the crochet class, 1st, Mrs. Harry Steckley, 2nd, Mrs. John Spillman. All articles in this contest are to be sold at the bazaar. The next meeting is to be held at the home of Mrs. C. Ray the last Thursday in October.

Scout and Cub Corner.

Scouts will muster 7:30 p.m. to-night at the Hall. Duty Patrol: Stage.

Enroute to a Scout camp, Tacoma, Wash., Sea Scouts ran ashore on an unmarked shoal. The shoal moved and turned into a whale, which came to the surface, slid from under the boat and endeavored to smack it with its tail. A tail tip struck and bent the Scout craft's railing.

The following item, clipped from an English newspaper, makes good reading. The editor of the local scout news, "Lone Pine," in winding up his report on the district's aquatic sports and camp fire, writes: "In conclusion, we would explain that the lipstick which appeared on the face of a certain Rover, particularly his lips, although applied by a lady unknown to us, was, however, put there by a method duly expressed as satisfactory by the many observers of the ceremony. May we pen our thanks to the unknown lady by adding this little touch of 'color' to her efforts."

Items of Interest

Mrs. John Crocket of Delburne has produced a preserving sealer of real ancient vintage. It is a 1 quart size with a small opening and across its barrel are the words "Mason's Patent, Nov. 30, 1858."

Foraging among a bookseller's bargains in Cardiff, Wales, Oswald James found a book his wife (now dead) had given him 40 years before.

The Slicker who forged seven cheques in the name of J. Bentz, Olds stock dealer, some weeks ago and left local merchants holding the sack for over \$400 has apparently made a clean get-away.

City officials at Mobile, Alabama have a problem in deciding the legality of Oliver Haas' vote—all because he moved his bedroom. The city line extends through Haas' home and he pays city taxes on the "city" half of his property and sleeps in the "rural" half. The officials have to decide whether his residence is decided by his waking or sleeping abode.

Legal action as a result of the federal investigation report finding an alleged tobacco combine existed in Alberta was under consideration in Edmonton on Friday at a conference between local tobacco companies and Alberta government officials.

According to figures submitted by the Dominion Bureau of Statistics to the special Senate Committee on Railways, the Government railways required assistance from the taxpayer to an average amount of \$78,000,000 per year in the ten years ended with December 31, 1926. The rate of loss thus was \$150 per minute or about \$25 in the ten seconds required to read this paragraph.

Laying for
the EAST

The East Likes Western Poultry to the Tune of Nearly \$2,000,000 a year

Not only do Western hens lay for the East to the extent of over 50,000,000 eggs a year, but over 6,000,000 lbs. of them, and their consorts, go East in person to grace the dining tables of Eastern industrial workers.

The East needs the West to feed it. The West needs the East as a market for its produce; so the two work together — the East by spending over \$40,000,000 a year with the Western farmer, and the West — by buying Canadian-built cars.

And that's a point worth remembering, for every car bought in the West helps not only the food-consuming automobile worker — it keeps men working and on payrolls in the rubber, paint, glass, steel, parts, chemicals and many other Eastern industries, to the ultimate advantage of the Westerner himself.

For statistical and further information about this industry, write to Automotive Industries, 1006 Dundas Building, Toronto.

AUTOMOTIVE INDUSTRIES OF CANADA

WORLD HAPPENINGS BRIEFLY TOLD

Northern Alberta's wheat crop this year will average 19 bushels to the acre and average No. 3 Northern in grade, it was disclosed in the Edmonton Journal's crop survey.

Hon. Alastair Buchan, younger son of Lord Tweedsmuir, sailed from Quebec for England aboard the liner Empress of Australia after spending a three-month vacation in Canada.

Main road into Cypress Hills park has been named "Pass of Killiecrankie"—the suggestion of Lord Tweedsmuir when he visited the Saskatchewan park this year.

Loans under the Dominion Housing Act and the National Housing Act amounted to \$22,185,564 last August, the finance department announced at Ottawa.

Zellaten Gheta Herouy, 60, Ethiopian foreign minister, who followed Emperor Haile Selassie into exile, when Italians over-ran Ethiopia, is dead.

A shipment of gold and silver bars declared by border officials to be worth \$4,325,000 arrived in France from Barcelona, seat of the Spanish government.

Poland has asked the League of Nations to take charge of thousands of would-be immigrants, mostly Jews, which the Warsaw government is anxious to move outside the country.

"Dolly", believed to be the oldest horse on the North American continent and owned by Walter Carruthers of Turnberry township, Ont., is dead. Carruthers said the horse, which he bought in 1907, was 41.

Southern Alberta's sugar beet crop is estimated at 250,000 tons from 20,000 acres. Estimates of the 1938 sugar production run as high as 80,000,000 pounds, compared with 76,600,000 pounds last year.

Youthful Scientist

New Device Records The Vitamin A Content Of The Human Body

Invention of a device which determines the vitamin A content of a human system in 30 seconds was announced at Edmonton by Dr. Lionel Bradley Pett, youthful university of Alberta lecturer-scientist.

Lack of vitamin A is related closely to "night blindness", colds and other diseases of the nose and throat, Dr. Pett said.

The device, simple in appearance but actually mathematically involved in its construction, outwardly resembles a circus midway "penny peep" machine. Staring into the peep-tubes, a patient's eyes are dazzled by a strong light shining on white paper.

The length of time taken for the eyes to return to normal shows any deficiency in vitamin A content, Dr. Pett explained. "Slight recovery time for a person whose system contains the proper amount of vitamin A apparently is nine seconds, my experiments have shown," he said.

Alfalfa In Surgery

Can Be Used For The Purpose Of Staunching Blood

Alfalfa hay has become an important item in modern surgery, according to Dr. G. G. Moe, professor of agronomy at the University of British Columbia.

"Alfalfa yields a certain product useful in surgery," Dr. Moe said in an address at a farmers' field day meeting. "This product is applied for the staunching of blood. It causes certain coagulation which stops bleeding."

The largest meteor on record was that of Aug. 18, 1783, which traversed Europe from Shetland to Italy at 30 miles a second.

England's poet-laureate in the 14th century, Geoffrey Chaucer, took his compensation in the form of a yearly allowance of wine.

The name "dime" for the American 10-cent piece came from an expression denoting payment in full by a kiss.

Geese are used as "watchdogs" around the home in the West Indies.

Ability doesn't grow like whiskers, without effort.

Dominion Drama Finals

Will Be Held In London, Ont., During April 1939

The 1939 Dominion Drama finals will be held in London in Easter week, April 10 to 15. The Western Ontario festival takes place in Hamilton, January 25, 26, 27 and 28.

D. Park Jamieson, of Sarnia, honorary director-general of the Western Ontario Drama League, has been named chairman of the London festival committee, in preparation for this, the first national drama festival to be held in that city. As yet, adjudicators have not been secured for either the Dominion or regional festivals of 1939.

Both full-length and one-act plays will be included on the program for the Dominion festival.

To encourage play-writing of longer vehicles in Western Ontario the W.O.D.L. offers a prize of \$50 for a play to run from one to three hours. Entries may be made to Mrs. C. W. Adams, 348 Aberdeen avenue, Hamilton, up to December 1. The entries are not for production but will be judged on their merits as plays.

A prize of \$10 is offered by the W.O.D.L. for the best cover design for the Dominion festival program, and a second award of \$10 for the best design for the contestants' pin, for the national finals.

A NEW "DRESS-UP" SLIMLINER

By Anne Adams

You're admiring its slender lines and dignified youthfulness, but are you stopping to consider how simple this new style is to sew? Anne Adams, the designer of Pattern 4847, wants to stress the ease with which those long seams go together. Choose a silk or synthetic in one of the very new violet shades, or any other becoming Fall hue, and you'll quickly complete a dress in which you will "shine" at informal parties. It will especially delight those with large bust measurements, for the bodice features soft, horizontal gathers from the beautifully slimming centre panel! Note the sleeves—you have choice of an attractive short version, or an equally good long style.

Pattern 4847 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 3 3/4 yards 39 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Patterns Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Teacher (helping Jane fasten her coat): "Did your mother hook this coat for you?"

Jane: "No, ma'am, she bought it."

The Portuguese West African mud-skipper fish cannot swim. It breathes through its tail and drowns when it goes out of its depth.

In French Indo-China, the women wear trousers, men wear skirts, and children are given numbers instead of names.

Must Be Experienced

Only Financed Prospector Has Any Opportunity In Yellowknife

There is no place for the transient in the Yellowknife gold field, two officials of the mines and resources department, back from a tour of inspection of schools, hospitals, government offices and mining districts in the Northwest Territories, reported at Ottawa. Yellowknife, on the north shore of Great Slave Lake, is Canada's newest mining centre.

The financed prospector, the hard rock miners and construction workers have a chance for employment during the field season in the Yellowknife field, Canada's farthest north gold workings, but even these should have guaranteed jobs before departure. For others there is no work, said R. A. Gibson, director of the lands, parks and forestry branch, department of mines and resources, and A. L. Cumming, Mackenzie district superintendent.

Travel around the field is almost entirely by aeroplane, though the trip to Yellowknife may be made by boat. It costs a lot of money to get around and there are no facilities for the care of the stranded.

All food must be purchased. Meat can be bought from the Indians who have exclusive hunting rights. Non-perishable vegetables and other foods are brought in by boat and taken to the mining camps by 'planes. Fresh vegetables are imported by 'plane from Peace River and Edmonton. 'Plane rate for fresh fruits and vegetables from Peace River to Yellowknife is 27 1/2 cents a pound.

Both sides of the Yellowknife River, for many miles north of the town of Yellowknife, are staked out. Prospectors, usually taken in by 'plane, are busy for many miles east and west of the staked territory and new finds may bring new settlements in the near future.

Since gold was discovered in the Yellowknife territory four years ago there has been an influx of prospectors from Ontario and Quebec, veterans who have backing. The field is not positively proven. It is not known whether ore values found on the surface persist at depth and it will be two years or more before the importance and extent of the field is determined.

Meanwhile the new mining camps grow in population and activity. In and around Yellowknife there are approximately 1,000 white people. The sub-mining recorder at Yellowknife is the town's policeman and the medical health officer acts as sanitary inspector.

The motor-car has almost done away with the horse, but not with the ass.

The world's chief source of asbestos is found in the vicinity of Thetford Mines, Quebec.

Men are destroyed by the things they have made.

Revise Customs Act

Lack Of Clarity Is Matter Of Considerable Complaint

Complete revision of the Customs Act will be one of the outstanding matters with which parliament will have to deal next session. Already an inter-departmental committee, headed by H. D. Scully, commissioner of customs, has completed a draft of a wholly re-written act. Consideration to this is being given by Revenue Minister J. L. Halsey.

It is understood the minister will place the draft before the cabinet, with suggestion that Canadian industry generally be consulted before final approval is given and the legislation presented to parliament. This plan would be in line with the policy adopted some years ago when the iron and steel schedules of the tariff were overhauled. On that occasion extensive hearings were held by the old tariff advisory board.

The language of the Customs Act has frequently been criticized by those whose business it affects. In the West the claim is made that some sections of the Act vest too much discretion in the customs officials, and that the phraseology is so loose that varying interpretations can be applied to it.

From time to time George H. Sedgewick, chairman of the tariff board, has complained of the lack of clarity which characterizes some sections. Severe strictures on the same lines were pronounced by Justice W. F. A. Turgeon when he was probing the textile industry.

The committee has been at work for more than a year.

Medical Air Service

Corps Of Flying Doctors To Serve Settlers Advocated For Alberta

Alberta may have a corps of flying doctors to serve settlers in isolated districts if a plan of Dr. Enna M. Johnstone of Wandering River, is adopted.

Establishment of a medical air service for outlying districts was advocated by Dr. Johnstone when she addressed the annual convention of the Alberta division of the Canadian Medical Association at Calgary.

"I am not advising the government, but simply suggest a scheme which might be made available by private effort," she said.

Approximately 12 per cent. of the fuel energy of an automobile is used by the transmission and engine friction.

As a rule, the genuine antique is uncomfortable. A comfortable piece of furniture wears out in its own time.

The many-legged millipede can roll itself into a perfect sphere, as a protection against an enemy.

A barrel cactus is more than 90 per cent. water.

Will Cause A Sensation

New Testament In Novel Form Has Been Published

Publication of a new translation of the New Testament in the form of a half-crown novel is expected to cause a sensation in religious circles, says the London Sunday Dispatch. It is printed in modern type with a two-color dust-jacket and colored binding, the publishers being the United Society for Christian Literature.

But the appearance of the book, unusual though it may be, will not cause half so much controversy as the wording of the translation.

Rev. R. Mercer Wilson, general secretary of the Religious Tract Society, who is the translator, has made many striking changes in the text, and some of his interpretations will cause widespread discussion and arguments.

In order to get what he claims to be the true meaning of many passages, he has reverted to early Greek manuscripts and to Tyndale's Bible.

Rev. R. Mercer Wilson, who has been working 14 hours a day for a year on his new version, explained some of the changes and brief omissions he has made.

"For instance, the passage in St. Luke XVIII, 'It is easier for a camel to go through a needle's eye than for a rich man to enter into the Kingdom of God,' becomes in our modern version, 'It is easier for a rope to go through the eye of a needle than for a rich man to enter the Kingdom of God.'"

"The Aramaic word for 'camel' is the same as for 'rope', and Our Lord is far more likely to have made natural comparisons. This rendering makes the passage more intelligible without altering the sense."

Mr. Wilson also explains by his translation what is meant by the phrase "publicans and sinners."

"The proper translations of the Greek makes it clear that the phrase means tax-collectors and outcasts," he said.

"Jews who turned tax-collectors for the Romans were regarded as beyond the pale, and ostracised. Since everyone is a sinner, it is obvious that by 'sinners' is meant outcasts."

Adopts New Scheme

Motorcycle Police In Aberdeen To Be Equipped With Radio

Policemen cycling round lonely beats in Aberdeen, Scotland, are to be linked by radio with headquarters just like mobile officers in cars.

Aberdeen is the first place to adopt the scheme. Two-way three-valve radio sets designed by the police themselves, are to be carried on their cycles.

The men will be able to receive calls from headquarters and talk back as well. The radio sets will be carried inside toolbags behind the saddle; the receiver-microphone will clip on the handlebar.

SIR EDWARD BEATTY MADE FREEMAN OF CRANBROOK

Crimson-coated Royal Canadian Mounted Police and khaki-clad British Columbia police lent color to the scene when Sir Edward Beatty, chairman and president of the Canadian Pacific Railway, attended Cranbrook's Pioneer Reunion to receive the freedom of the city and hear himself extolled as outstanding Canadian and head of the company which 40 years ago forged the Crow's Nest Pass link of its great railway system into the rich Kootenay country. Sir Edward is seen receiving a silver tray commemorating the occasion from Mayor T. M. Roberts. On Sir Edward's left is Judge G. H. Thompson, who swore him in as a freeman of the bustling East Kootenay city.

COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER • • • W.N.U. SERVICE

CHAPTER IV.—Continued

"Of course," The Seattle girl extended her hand, a long-armed gesture—Jeanne Towers accepted it, hesitantly. They smiled and exchanged greetings; suddenly Jack felt ill at ease and wondered why Jeanne Towers should be apologizing for her appearance. After all, they were the clothes she always wore. As for Kay, she had said nothing but pleasantries which, some way, seemed unpleasant. Jack Hammond could not understand it. He hurried to the other introductions. Then: "Won't you join us?" he asked. Jeanne drew back.

"No—no, thanks," she evaded. "I'm just going to have a bite. I've got to get back to the store."

Jeanne sought the farthest corner. A Chinese waiter approached, rubbing his hands on a dirty apron. "Glazing fish, lamb steak, deer steak, blare steak," he announced.

"Lay off the bear steak," Bruce Kenning warned. "It's tougher than old shoes."

"And don't ask about the vegetables," Hammond interjected. "They're all desiccated and—"

"Taste awful," announced Timmy. "I want venison."

"Let's all have venison," Kay suggested, and with the order given, leaned back on the bench, her hands behind her. "The idea of being snooty about a venison steak."

"What I'd like right now," said Timmy Moon, "is a nice, juicy grub-stake, so I could buy another plane and make a lot of money out of flying supplies into this country."

Kay flaunted a hand.

"I'll grubstake you," she said, "as soon as I make my first million." Then she half turned, at a nudge from Mrs. Joyce. Her eyes swept the restaurant, pausing at intervals in a stare of appraisal. Hammond followed her gaze, knowing at what she looked and wondering as to the result. Around the World Annie, accompanied by some of her girls, minced the last of her meal at a near-by table. Kay appraised them all. Her full lips broke into the merest suggestion of a cynical smile. Then she said in a low tone to her mother, "Quite interesting, isn't it?"

Hammond did not catch the remark. He only noticed that before Kay lowered her eyes, she had looked toward the corner where Jeanne Towers sat. It made him want to explain; he remained silent, however, some way thankful that he had not told Kay it was Jeanne who had procured the woman to do the housework at the cabin. Suddenly he felt weak. Around the World Annie had risen, dusted the crumbs off her effulgent lap, and was heading straight for his table.

Again Hammond noticed that Mrs. Joyce nudged her daughter, again Kay looked up, then turned to animated conversation with Bruce Kenning. Around the World Annie came onward. Somewhat awkwardly Hammond got to his feet.

"Never mind that stuff," the dance-hall proprietor exclaimed. "I don't want to butt in. I wanted to know where I could find the pilot of that airplane."

Timmy Moon grinned.

"I'm it."

Around the World Annie raised

her diamond-sparkled hand to her bleached hair.

"I know now ain't no time to talk about it," she said, "you at dinner and everything. I just wanted to stick my oar in first. I got a lot of work for you—a guy will see you after while." Then, somewhat flustered by contact with hostile femininity, she walked on.

Jack Hammond laughed uneasily and wiped a hand across his damp forehead.

"Well, I'll say this," he sighed, "you're getting everything, all in one dose."

"What's her name?" asked Timmy Moon.

"Around the World Annie," Bruce Kenning volunteered. "She's putting up a big dance hall over on the Alaskan side of the line. Hasn't gotten it finished yet; that's why they're all eating over here."

"We would run into that bunch tonight," said Jack in whole-hearted discomfort. "I'd hoped to ease Kay into all this stuff rather gradually."

"Oh, don't be silly," the girl said. Hammond beamed.

"You'll do, all right!"

"Of course she'll do," Mrs. Joyce reached for her green holder. "Kay's no prude!"

"Certainly not. Besides, I think all this is simply gorgeous. Then, when I've found my claim and filed it or whatever you do—"

"As if you'd have to hunt a claim," Timmy broke in. "Jack wrote you he'd laid aside one for you."

"Is it rich?" the girl asked. "With gold nuggets sticking out everywhere?"

Hammond fenced laughingly.

"Well, I can't say that. None of them are really rich. My partner was saying to-day that we'd do well if we got fifty thousand out of our first claims."

Kay gasped.

"Only fifty thousand?"

"That's just one claim," Kenning interrupted. "Wait until they get into the real stuff."

"Where is it?" Mrs. Joyce had become interested. Hammond shrugged his shoulders.

"I wish we knew. We've an idea—but—"

"What you need," Kay interrupted, "is a good geologist to help you find it. That's what Father always said—never go into a mining deal without having a geologist to tell you where to go."

Hammond toyed with his tinny fork.

"I wish we could do a little consulting," he said seriously.

"Well," Kay flipped her hand toward Kenning. "There's your consultant."

Kenning laughed and called for her to soft pedal the press-agency. Hammond remained serious.

"My partner's one of these old-fashioned fellows who doesn't believe in science."

"McKenzie Joe, you know," Kenning supplied. Been up in this country most of his life."

"But don't people get queer—staying away from civilization all the time?" Kay asked.

"Bushed, we call it," Hammond explained.

"Well, it amounts to the same thing," she laughed. "I know what I'd do if I needed advice. I just wouldn't say anything to him about it."

Kenning covered the situation with a laugh.

"That's a woman's viewpoint for you."

"Women are right sometimes," Mrs. Joyce added. Timmy fussed with his knife and fork.

"Wish that Yellow Peril would bring on the steak. I'm going to eat the tablecloth in a minute"

"It'll be along," Hammond answered, glad of the change of conversation. "I'll try to get hold of that Chinaman—"

He raised his head, looking about the shoddy restaurant, only to pause as the door opened and a young man entered, paused a moment, then started forward at the sight of Hammond's party. He was a man Jack had not seen before, once well built, but now somewhat fallen away, as though his clothing did not fit, or an inactive life had robbed a frame once well filled by the outdoors. The sagging extended to his features, deep lines about his mouth, a thickness of the cheeks at each side of his nose. He raised a cigarette to his lips with a jerky movement, then snapped the arm quickly down at his side. Now he hesitated, as if wondering whether or not to interrupt. At last he decided against further approach and turned again to the door.

Hammond saw him glance toward the corner where Jeanne Towers sat and stiffen as though with surprise. Then he heard a sound from the corner, half gasp, half scream, that was smothered almost before it began. For an instant the two stared, as if each were petrified by the other's presence. Then the young man swung out the door, and Jeanne Towers, fighting mightily to pretend unconcern, returned to her meager meal.

CHAPTER V.

An hour later, Hammond saw the man again. The meal was finished and Jack was strolling through the camp with his guests; Kay had announced a tremendous interest in everything about her; she could not wait until morning, she said.

So now, picking their way along the dark passageways and trails which passed as streets, Hammond had done his best to give a picture of the place, its beginnings, its hopes. At last, tired, they had turned homeward, Timmy Moon lagging somewhat in the rear. Glancing back, Hammond saw the dim form of a man follow the aviator for a few moments—at last halting him. Timmy was late reaching the cottage.

"A Fellow Wanted Me to Make a Trip for Him."

"Where've you been?" asked Kay. The pilot grinned.

"A fellow wanted me to make a trip for him."

"That man who came into the Slumgullion?" Hammond asked. Timmy nodded. Kay Joyce shrugged her shoulders.

For Your Preserving

Use It This Year

"How far is it from here to Wrangell?" asked Timmy.

"To where?" Kay was yawning. "Wrangell, Alaska," Jack supplied. "It's about a hundred miles, air line."

"That's okay," said Timmy. "Fifty cents a mile; a hundred bucks for the round trip. Say," he queried, "there's a part of this lake that dips over on the Alaskan side of the line, isn't there?"

"Yes."

"Mind pointing it out to me?"

"Now?" asked Hammond.

"Sure. I'll be making an early get-away in the morning. Let's go outside."

"Well," said Kay, with another yawn, "if there's anything to see, let's take a look at it. Come on, Mother."

(To Be Continued)

New Type Of Engine

Aero Engine Developed In England Is Closely Guarded

A new type of aero engine, which has taken 2,500 skilled mechanics two years to produce to the entire satisfaction of the Air Ministry, is on view in the de Havilland Aircraft Works at Edgware, England.

It is the 520-h.p. air-cooled, Gipsy Twelve, four of which are installed in the 46-seater Albatross monoplane in which the North Atlantic crossing is to be attempted.

Although designed by Major Frank Halford as far back as August, 1934, it was not until March, 1936, that the Gipsy Twelve's components began to reach the engine shops at Stag Lane.

There are 1,080 major components, apart from some 500 washers and nuts and splitpins. They range from a gleaming steel crankshaft that weighs 85 pounds, 10 ounces, and a few odd drachms, to piston-rings which barely tip the scale at one ounce.

The Gipsy Twelve has attained its present form as a result of 2,000 hours on the test-bench and several hundred hours in the air, in addition to a 50-hour civil-type test demanded by the Air Ministry. The military test was carried out in conditions of the strictest secrecy.

It is claimed for the new type that it has a lower cooling loss than any other in production; and that it is the first aero engine, either air-cooled or liquid-cooled, to present in flight "a streamlined form of circular cross-section unbroken by the excrescence of cooling air scoops or radiators."

SELECTED RECIPES

DATE NUT LOAF

3 cups sifted flour
3 teaspoons Calumet Baking Powder
1/2 teaspoon salt
1/2 cup brown sugar, firmly packed
1/2 cup chopped walnut meats
1 cup finely cut dates
1 egg, well beaten
1 cup milk
4 tablespoons melted butter or other shortening.

Sift flour once, measure, add baking powder and salt, and sift again. Add sugar and mix well; then add nuts and dates. Combine egg, milk, and shortening; add to flour mixture and blend. Bake in greased loaf pan, 8x4x3 inches, in moderate oven (350 degrees F.) one hour, or until done. Store overnight before slicing.

HAM WAFFLES

2 cups sifted flour
2 teaspoons Calumet Baking Powder
1/2 teaspoon salt
3 egg yolks, well beaten
1 1/2 cups milk
5 tablespoons melted butter or other shortening
3 egg whites, stiffly beaten
1 cup finely cut, boiled ham

Sift flour once, measure, add baking powder and salt, and sift again. Combine egg yolks and milk; add gradually to flour, beating only until smooth. Add shortening. Fold in egg whites. Bake in hot waffle iron, sprinkling each waffle with 1/4 cup ham just before closing waffle iron. Serve with butter and Log Cabin Syrup, or with scrambled eggs. Makes four or five 4-section waffles.

Farm Goes Modern

A cow living on a farm near St. Marys fell into an old well. She was taken out by the wrecking car from a garage just the same as a broken car is hauled from the ditch. So the farm seems to be going a bit modern.

Tea growers of India are combining to regulate the production of tea.

Some men are like carbuncles on the neck of progress.

THE AWFUL PRICE YOU PAY FOR BEING NERVOUS

Quivering nerves can make you old and haggard looking, cranky and hard to live with—can keep you awake nights and rob you of good health, good times and jobs.

What you should try is a particularly good woman's tonic—and could you ask for anything whose benefits are better proved than that world-famous Lydia E. Pinkham's Vegetable Compound? Let its wholesome herbs and roots help Nature calm your shrieking nerves, tone up your system, give more energy and make life worth living again.

More than a million women have reported benefit—why not let Pinkham's Compound help YOU, too, to go "smiling thru" trying times like it has other grateful women for the past 3 generations? IT MUST BE GOOD!

Long Canoe Trip

Take 600-Mile Journey Down The Assiniboine River

Difference between modern travel and traffic a century ago was driven home to three boatmen at Winnipeg recently.

Harry Bushel, his 14-year-old son, Andy, and Murray Peden started out by canoe on the Assiniboine river from Brandon to paddle to Winnipeg. The 150-mile trip ordinarily is made in about three hours by automobile but it took the paddlers 18 days to complete the voyage.

They estimated the winding river route is 600 miles in length and their one desire near the journey's end was to beach the canoe, climb into civilized clothing and head for the nearest movie.

The trip was made in a 16-foot canoe and they carried 600 pounds of equipment. Actual time on the water was about seven hours a day for 13 days. The rest of the time was spent on stop-overs.

There were many rocks and rapids along the way, Bushel said, and the going was "tough" during the first four days. Nights were spent along the river bank in a tent. They started out about six o'clock each morning.

There were no spills, Bushel said, although once the rapids swirled the boat around and they shot down the river backwards.

In Everyone's Power

Opportunities To Give Pleasure Are On Every Hand

Lord Nuffield heard that a motor car was needed for an old folks' home. He sent one.

Very nice to be Lord Nuffield, and able to give away a motorcar, you may say.

But that's hardly the point, states the London Sunday Dispatch. The thing that matters is that we should all take the action within our power to give pleasure and supply a want.

Now I don't suppose any of us—certainly very few—are so hard up that we can't do that sometimes.

The thing that seems so small to you may mean so much to those who lack it. Perhaps, for instance, you know someone who never has a chance to go to a cinema? Would it be a real burden to you to take them one evening?

DO THIS: Massage his throat, chest, and back with Vicks VapoRub and tuck him into bed. Next, put a spoonful of VapoRub in a bowl of boiling water; place a newspaper or sheet over the child's head like a tent, covering the bowl too, so the medicated vapors can be inhaled for several minutes. This treatment loosens phlegm—clears air-passages—checks tendency to cough—relieves local congestion. Long after he relaxes into peaceful sleep, VapoRub's poultice—and vapor action is still bringing relief—and you can get a good night's rest too.

Mrs. WILSON'S
Main Street

LOCAL & GENERAL

Ed. Watkin, of the Builders' Hardware, made a business visit to Red Deer on Tuesday.

Geo. Royds of the Jenkins' (Lacombe) staff, spent the weekend at his home here.

George Boorman, who is teaching near Bentley, was a holiday visitor at his home here.

Mr. O. Kirk spent the Thanksgiving holidays visiting friends in Calgary.

Tom Royds and Alf Brusso were among those who took in the first ball game at Calgary on Thanksgiving Day.

Watch for announcement next week of a "baked owl" supper in the Leuzler Block on October 22nd.

Mrs. Henry Weber and Mrs. Jonathan Good were visitors with Mr. and Mrs. J. W. Halton on Thanksgiving Day.

Mr. and Mrs. A. Weber, of Calgary, were guests with the latter's mother, Mrs. E. G. Reitzel, during the Thanksgiving holidays.

Mr. and Mrs. Max Hearst, of Wayne, spent the holiday weekend with the latter's parents, Mr. and Mrs. Harry Pearson.

Mr. and Mrs. Stock, of Olds, accompanied by their daughter, Miss Elsie, visited their daughter, Mrs. Boorman, for the Thanksgiving holidays.

Mr. and Mrs. W. J. Hillyard of Penticton, B.C., were visiting friends and renewing acquaintances in town last weekend and for a few days this week.

The greatest actress of the screen in the greatest drama of the old American South.—Bette Davis in "Jezebel" at the movies Fri. & Sat. with Henry Fonda, George Brent.

Members of the Didsbury Agricultural Society will meet at C. E. Reiber's office next Tuesday, October 18 at 2 p.m. for the annual meeting.

A. Melville Anderson, Optometrist and Optician, 224 8th Avenue West, established in Calgary since 1910, will be in Didsbury at the Rosebud Hotel, Monday afternoon Oct. 17th.

All interested in the reorganization of the Didsbury Band are asked to attend practice next Wednesday in the School at 8 p.m.—and we mean pronto!

Mrs. J. A. Mowers and daughter, Holly Belle, of Sibbald, Alta., is visiting this week with her daughter Miss Rena Mowers. Mrs. Mowers was a former resident of Didsbury.

Mr. Howard Halliday attended the funeral in Calgary on Saturday of his grandparent, Mrs. Catherine Halliday, who died in Edmonton on Wednesday last at the age of 89 years.

The senior member of the Pioneer staff was at Jim McDougall's farm west of town on Thanksgiving afternoon. Jim was threshing, so he tested Bill out to find if he knew the right end of a pitchfork.

Bob Eubank and George Royds motored out to the new oil prospect at Bearberry. They report a lot of activity there and were told that the drilling had gone below the 4,700-ft. level.

Miss Peterson, matron of the local hospital, attended the "refresher" course and convention of the Alberta Nurses' Association held at the Palliser Hotel, Calgary, last week. A session of the convention was also held at the mental hospital at Ponoka.

Hear ye! Hear ye! The Westcott Women's Institute has planned its annual concert and bazaar for Friday evening, November 4th, at Westcott School. Miss Theresa M. Siegel, well-known Calgary elocutionist, will head a first-class program of popular appeal that will include musical, vocal and miscellaneous items. Admission 25c, including lunch. Children under 12, 15c. There is to be a 10-cent fishpond in connection with the bazaar. Bring the entire family for an evening of worthwhile entertainment and mirth. Lastly, don't forget this date—Friday night, November 4th, Westcott School, 8 o'clock.

LOCAL & GENERAL

Dance at Melvin Community Hall on Friday, October 14th.

Miss Anne Holub was in Regina over the weekend, where she visited her aunt, Mrs. Holub, and her two cousins, Victoria and Henry.

Didsbury took third place in the Interscholar track meet held at Carstairs last week. Johnnie Holub and Marguerite Fisher were high scorers on Didsbury's team. It is expected that they will be medal winners.

Messrs. A. McNaughton and A. Brusso, local municipal secretaries, have opened an office in the Kemp Block, Olds, and will be in attendance at that point each Tuesday until the end of the year.

Build the fire, fill the pot, Soon 'twill be piping hot, For this is the gypsies' lot. The gypsies are coming to town. Await further announcements from Knox Junior Choir.

A meeting will be held at the Legion Hall on Tuesday October 20 to reorganize the 20th Century Club. All old members and any of the younger married set who are interested are asked to attend.

Mr. and Mrs. J. H. Lowrie and family, who have been living in Calgary, intend returning next month to make their home in Didsbury. They have rented the Weber house, their former residence, in East Didsbury.

A farm hand named William Scott, whose home is in Calgary, suffered a compound fracture of his leg above the ankle when a bundle rack overturned while he was working on the Ben Krueger threshing outfit on Wednesday morning. He was brought to the hospital here and will later be taken to Calgary.

Knox United Church W.M.S. will hold their Thankoffering meeting in the church on Tuesday, Oct. 18th, at 3 p.m. The guest speaker will be Mrs. W. C. Scott, of Nanton. Special music, and a social hour will complete a very profitable and enjoyable afternoon. All ladies interested are cordially invited to come to this meeting.

Neighbors and friends of Mrs. George Innis "surprised" her last Thursday with a farewell party, as Mrs. Innis is leaving this week for her old home in Scotland. The guest-of-honor was presented with a sum of money with which to purchase a suitable gift, her choice proving to be a travelling case. Mrs. Innis' many friends wish for her a happy and pleasurable vacation.

"Same Way Today."

The prodigal ate of the fatted calf
When penniless he returned
From distant lands where once he'd
roamed,
While old home-ties were spurned,
And the Good Book rates him a hero,
too;
But here's where we get a laugh:
It speaks but ill of the stay-at-home—
The fool that raised the calf!
—L.J.W.
